CS 212 – Spring 2019 – Project 4

Assigned: 4 December 2019
Due: 12 December 2019
Cutoff: 12 December 2019 (midnight; no exceptions)

Create an Edit Menu in your GUI

Add a second menu to the GUI called *Edit* which will have one menu item called *Search*. Clicking on search should prompt the user using a JOptionPane input dialog to enter a candle's price. The GUI should then display only candles at or below that price. You will need to write a second menu handler called *EditMenuHandler*.

Create a jar file called **Project4.jar** and submit that to Blackboard by the due date for full credit.
